# POWERING YOUR BUSINESS

## THE COMPLETE SOLUTION

TPS Electrical are providing design, installation and testing services for their clients in all aspects of electrical work.

TPS Electrical work with the industry's leading manufacturers to deliver the highest quality electrical solutions through its ECA accredited installation teams. Working with some leading brand companies as well as local businesses we are able to deliver electrical installation solutions of all sizes and complexity efficiently and effectively.

## TPS Electrical is part of the TPS360 group of companies providing the total solution to our prestigious client list.

Our team of electrical engineers and installers can support your business electrical requirements from adding a new socket to a full design and build service.

Our engineers are experienced in Industrial, commercial and domestic installations; designing and installing 3 phase and single phase power, lighting systems, fire, security and data systems.

Working with leading manufacturers we are well positioned to offer high value solutions to your specifications as well as value engineering your project to meet your budget.

Specialist design of energy efficient and decorative lighting schemes.

### Typical applications:

Industrial & Commercial • Design & Installation • Data, CCTV, Fire • Testing & Inspection

### Technical

All our work is designed, installed, tested and certified to BS7671 17th edition regulations. As members of the ECA we uphold the highest standards in quality and safety.

We offer free surveys and evaluations to assess your premises from a safety or energy perspective (or both). This initial survey will identify compliance gaps and opportunities for energy saving which we can help you realise through a full survey, design and implementation service.

### TPS360 can also provide

- PAT testing
- Motor control design
- PLC system design and build
- Control panel building
- Instrument calibration and service

Resin Flooring

Construction

Polished Concrete
